

2500 kg with Quick-Lift

V

**PT pallet trucks**

The new REMA PT pallet trucks fitted with pump (model 25) are very manoeuvrable and user-friendly.

The tandem fork rollers are advantageous when using these pallet truck on a less smooth floor.

Single truck roller designs are frequently used in the transport sector (rubber steer wheels and polyurethane rollers).

**Operation**

- All pump functions can be operated precisely by means of the three-position control lever.
- Variable lowering speed even under load.
- The tow bar will automatically return to vertical position.

**Hydraulics**

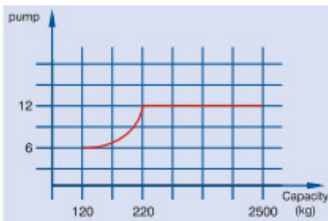

- Quick-Lift pump (model 25) for a quick lifting of pallets.
- The pump unit has an overload protection function.
- A chromate-coated and polished piston rod provides a long life for the hydraulic cylinder.

**Forks**

The robust plate steel fork profiles have flattened ends and they are fitted with in- and outrunning rollers to move pallets easier.

**Specifications**

- Lowest fork position .....85 mm
- Highest fork position .....200 mm
- Width per fork.....160 mm
- Steering wheels.....200 mm
- Fork rolls.....82 mm
- Mass type 20 and 25 .....73~80 kg
- type 30 .....90 kg

Quick-lift pump

Encapsulated pump unit

Added fork reinforcements
